

Mississippi-Missouri

The Mississippi, with the Missouri, is the longest river system in North America, and the fourth longest in the world. Running from Red Rock, Montana, to the Gulf of Mexico, the river drains 31 U.S. states and 2 Canadian provinces, and divides the United States into east and west.

A stitch
in time...

The Caribbean

Named after the Caribs, one of the native peoples who inhabited this region, the Caribbean Sea is surrounded by a chain of mainly volcanic islands—the Greater Antilles to its north, the Lesser Antilles to its east—which benefit from an alluringly warm climate, but are often subject to hurricanes during summer and fall.
