

APOLLO 11

Manned lunar landing

On 16 July 1969, Apollo 11, the mission to land the first humans on the Moon, blasted off. Three days later, Neil Armstrong became the first man to set foot on the lunar surface. Buzz Aldrin joined him 20 minutes later, while Michael Collins remained in orbit in the Apollo command module. Armstrong and Aldrin spent 21 hours, 36 minutes on the Moon's surface.

Buzz Aldrin

The Passive Seismic Experiment detected moonquakes

The Apollo 11 crew **returned with 21.55 kg (47.5 lb) of moon rock.**
