

SALYUT 1

Space station

Salyut 1 was the first space station to orbit Earth. It was an experiment to discover if astronauts could live and work in space for long periods of time. The first crew on Salyut 1 stayed on board for 23 days – a new record for time spent in space.

DATA FILE

SIZE: 20 m (65.5 ft) long

DATE OF LAUNCH: 19 April 1971

MISSION DURATION: 5 months, 22 days (de-orbited)

SPACE AGENCY: Russian space program

Salyut 1 travelled 118.6 million km (73.7 million miles) in its 175 days in orbit.

Soyuz 11 delivered the first cosmonauts to Salyut 1

Solar panels supplied the space station with power

Cosmonauts lived in the largest of the three compartments
