

# APOLLO 17

*Manned lunar landing*

The last of the manned Apollo missions, Apollo 17 was the first to send a scientist into space – the geologist Harrison Schmitt. The astronauts targeted an area on the Moon called Taurus-Littrow, which is rich in volcanic rocks. Lasting for about 75 hours, this was the longest mission on the lunar surface. It also broke the record for the longest moonwalk.

## DATA FILE

 **SIZE:** Command module – 11 m (36 ft) long; Rover – 3.1 m (10 ft) long

 **DATE OF LAUNCH:** 7 December 1972

 **MISSION DURATION:** 12 days, 13 hours, 51 minutes

 **SPACE AGENCY:** NASA

Commander Gene Cernan takes the lunar rover out for a ride

**Gene Cernan** was the last human to set foot on the Moon.
