

COMA BERENICES

Berenices' Hair

Coma Berenices is a faint, but interesting, constellation. Dozens of faint stars form a wedge-shaped group called the Coma Star Cluster, easily seen through binoculars.

DATA FILE

SIZE RANKING: 42nd

BRIGHTEST STAR: Beta Comae Berenices

MONTH WHEN BEST VISIBLE: May – Northern hemisphere

LEO

The Lion

Leo really looks like what it is supposed to represent – a crouching lion. Its brightest star, Regulus, marks Leo's heart, and spins in just 16 hours – compared to the Sun's 30 days.

DATA FILE

SIZE RANKING: 12th

BRIGHTEST STAR: Regulus

MONTH WHEN BEST VISIBLE: April – Northern hemisphere
