

CAPRICORNUS

The Sea Goat

This constellation is shown as a goat with a fish tail. A careful look at Algedi reveals it is a pair of stars: each of these is a close double (telescope needed). Binoculars show Dabih is also a double star.

DATA FILE

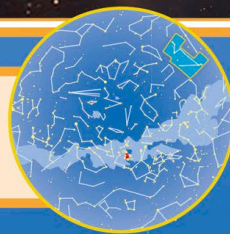

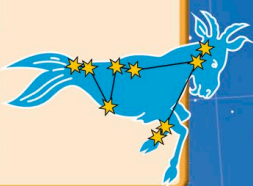

SIZE RANKING: 40th

BRIGHTEST STARS: Algedi and Dabih

MONTH WHEN BEST VISIBLE:
September – Southern hemisphere

MICROSCOPIUM

The Microscope

French astronomer Nicolas Louis de Lacaille named Microscopium in the 1750s. He created 14 new constellations that depicted many scientific instruments, here the microscope.

DATA FILE

SIZE RANKING: 66th

BRIGHTEST STAR: Gamma Microscopii

MONTH WHEN BEST VISIBLE:
September – Southern hemisphere
