

CARINA

The Keel

Carina is one of the three parts into which the Greek constellation of Argo Navis, the ship of Jason of the Argonauts, was split. It contains the brilliant Canopus, the second brightest star in the sky.

DATA FILE

SIZE RANKING: 34th

BRIGHTEST STAR: Canopus

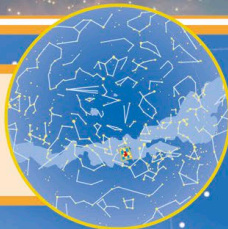

MONTH WHEN BEST VISIBLE:
March – Southern hemisphere

CRUX

The Southern Cross

Also known as the Southern Cross, this is the smallest of the 88 constellations. NGC 4775, also known as the Jewel Box, a beautiful cluster of stars, lies to the left of the cross shape.
