

GRUS

The Crane

The constellation Grus represents a crane, a long-legged wading bird. If you look carefully you can see that several of the stars in this pattern are actually close double stars.

DATA FILE

SIZE RANKING: 45th

BRIGHTEST STAR: Alnair

MONTH WHEN BEST VISIBLE:
October – Southern hemisphere

PHOENIX

The Phoenix

Representing a mythical bird that was said to be reborn from its own ashes every 500 years, Phoenix contains Zeta Phoenicis, a star that dims every 1.7 days as a fainter star moves in front of it.

DATA FILE

SIZE RANKING: 37th
