

SPACE EXPLORATION

Timeline

The exploration of space started with the launch of the first satellite, Sputnik 1, in 1957. Within 12 years, people had walked on the Moon. By 2016, we had explored the furthest reaches of our Solar System, and the quest for knowledge is set to continue.

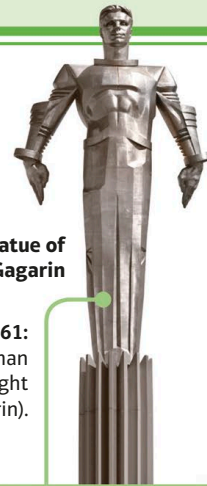

4 October 1957: First artificial satellite, Sputnik 1, is launched into space.

Sputnik 1

12 April 1961: First human spaceflight (Yuri Gagarin).

Statue of Yuri Gagarin

18 March 1965: First spacewalk (Alexei Leonov).

Space dog Laika

3 November 1957: First animal in orbit (the dog Laika).

29 October 1991: Galileo probe makes first fly-by of asteroid.

16 June 1963: First woman in space (Valentina Tereshkova).

Opportunity

25 January 2004: Rover lands on Mars to study for signs of past water (Opportunity).
