

THE WORLD'S SPACE AGENCIES

NASA

NAME: National Aeronautics and Space Administration

COUNTRY: USA

FOUNDED: 29 July 1958

HEADQUARTERS: Washington, DC

As of 2016, around 70 countries in the world are busy building spacecraft, though only 13 of them have their own rockets to launch spacecraft – including the European Space Agency (ESA), which includes many countries in Europe. Only three of the world's space agencies – NASA (United States), ROSCOSMOS (Russia), and CNSA (China) – have launched humans into space.

ESA

NAME: European Space Agency

COUNTRIES: 22 from Europe, and Canada

FOUNDED: 30 May 1975

HEADQUARTERS: Paris, France
