

DATA FILE

TIME TO ROTATE ONCE: 24.6 hours

YEAR: 687 Earth days

MOONS: 2

SURFACE TEMPERATURE:
-143 to 35°C (-225 to 95°F)

The mantle is a deep
layer of silicate rock

Mars' small core is
partially liquid, and
made of iron

Mars' biggest
volcano, **Olympus
Mons** is 22 km
(13 miles) high,
and could almost
cover France.

Mars' crust
shows signs of
ancient oceans
and rivers

Valles
Marineris

Mars' thin
atmosphere is
made of 95 per
cent carbon dioxide
