

VALENTINA TERESHKOVA

Born 1937

19 years would
pass before
another **female**
astronaut flew
in space.

An amateur skydiver, Valentina Tereshkova spent three days in space in 1963, completing 48 orbits of Earth. Part of her mission was to fly her spacecraft in formation with another Russian capsule. She later became a politician and, in 2013, volunteered to go on a one-way journey to Mars.
