

ARNO PENZIAS AND ROBERT WILSON

Born 1933 and 1936

In 1964, using a giant antenna in New Jersey, United States, Arno Penzias and Robert Wilson detected a faint noise coming from all over the sky. They realized that the noise was radiation – leftover heat from a giant explosion, emitted by hot gas that filled the early Universe. Named “Cosmic Microwave Background”, the radiation was clinching evidence for the Big Bang.

Arno Penzias

Robert Wilson

Their discovery won the pair a **Nobel Prize** in 1978.

DATA FILE

KEY DISCOVERY: Proved the Big Bang theory

COUNTRY OF ORIGIN: United States

YEAR OF DISCOVERY: 1964
