

VALERI POLYAKOV

Born 1942

An expert in the field of space medicine, Valeri Polyakov spent long periods in Earth's orbit on the Russian space station Mir. After a first mission of eight months from August 1988 to April 1989, he returned to Mir nearly five years later and spent 14 months on the space station. The 437.7 days he spent on the second trip is a record.

During his time in space, Polyakov travelled **300 million km** (187 million miles) in Mir.

Mir Space Station

DATA FILE

KEY ACHIEVEMENT: Longest time continuously spent in space

COUNTRY OF ORIGIN: Russia

YEAR OF ACHIEVEMENT: 1995
