

BUBBLE BLASTER

Time to play

Well done! You've finished writing Bubble blaster and it's now ready to play. Run the program and try it out. If something isn't working, remember the debugging tips—look back carefully over the code on the previous pages to make sure everything is typed out correctly.

△ Controls

The submarine is steered using the arrow keys. The program can be adjusted so it works with other controls.

■ ■ EXPERT TIPS

Improving your game

All computer games start as a basic idea. They are then played, tested, adjusted, and improved. Think of this as version one of your game. Here are some suggestions of how you could change and improve it with new code:

Make the game harder by adjusting the time limit and the score required for bonus time.

Choose a different color for your submarine.

Create a more detailed submarine graphic.

Have a special type of bubble that increases the speed of the submarine.

Add a smart bomb that deletes all of the bubbles when you press the spacebar.

Build a leaderboard to keep track of the best scores.
