

What is Python?

People around the world use Python to build games, tools, and websites. It's a great language to master because it can help you build all kinds of different programs. Python looks like a mixture of recognizable words and characters, so it can be easily read and understood by humans.

A program written
in Python

```
ghostgame

# Ghost Game
from random import randint
print('Ghost Game')
feeling_brave = True
score = 0
while feeling_brave:
    ghost_door = randint(1, 3)
    print('Three doors ahead...')
```

Getting started

It's time to start programming. All you need is a computer with an Internet connection. This book starts with Scratch—the perfect language to help you on your way to becoming a coding expert. Get ready to jump into the exciting world of computer coding.

EXPERT TIPS

Enjoy experimenting

As a programmer you should experiment with the code and programs you make. One of the best ways to learn programming is to play around and see what happens when you change different parts of the code. By tinkering and fiddling, you'll discover new ways of doing things. You'll learn much more about computer programming and have even more fun.
