

Creating and editing sprites

Games are more exciting when there are more sprites to hit, dodge, or chase each other around the stage.

It's simple to create, copy, and delete sprites.

▽ Create a sprite

Use the buttons above the sprite list to add or create a sprite for your program.

▽ Copy or delete a sprite

To copy a sprite and its scripts, right-click on it in the sprite list and choose "duplicate."

Naming a sprite

When you start a new program in Scratch the cat sprite is called "Sprite1." It's easier to write programs if you give your sprites more meaningful names. It also makes it easier to understand and manage scripts.

1 Select the sprite

Select a sprite in the sprite list, and then click on the blue "i" button in the corner.

2 Change the name

When the information panel opens, click on the text box and use the keyboard to change the name of the sprite.

Type the
sprite's new
name here

3 Renamed sprite

Click the blue arrow to the left of the sprite to close the information panel.
