

**2.** The specks rise up and up,  
and bump together to become  
droplets. Groups of droplets  
make clouds.

*Follow the circle  
with your finger.*

**3.** The droplets  
keep bumping  
together. They  
get bigger and  
bigger until they  
are too heavy  
to stay in the sky.

**4.** The water droplets  
fall back to the ground  
as rain, which runs into  
the seas, rivers, and  
lakes of the world.
