

Icy suncatcher

1

Arrange the slices of fruit at the bottom of the tin. There's no need to be too careful – the fruit will move about.

2

Add a little food colouring to a jug of water. Pour the water into the tin until it is about half full.

3

Cut a piece of string or ribbon, and drape the loop so part of it is under the water.

4

Put the tin in the freezer for at least three hours. Then push out the ice picture and hang it outside.
