

Make a weather vane

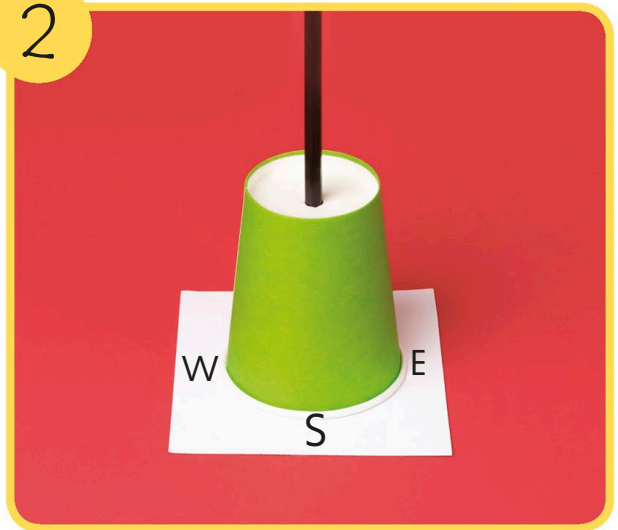

1

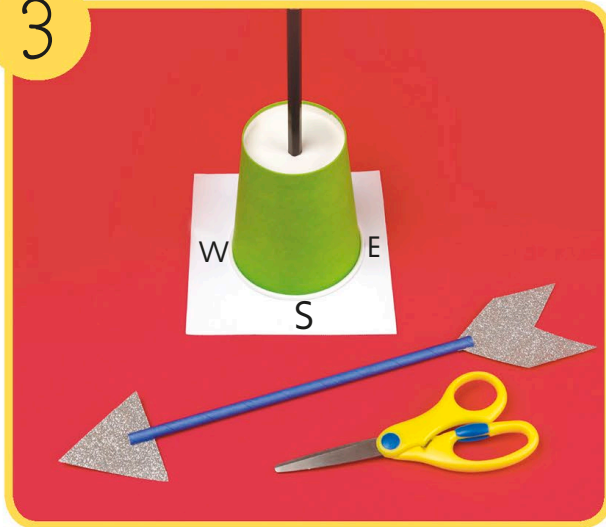

Cut out a square of card. Write N, S, E, and W in the positions shown. Put a large ball of sticky tack in the centre.

2

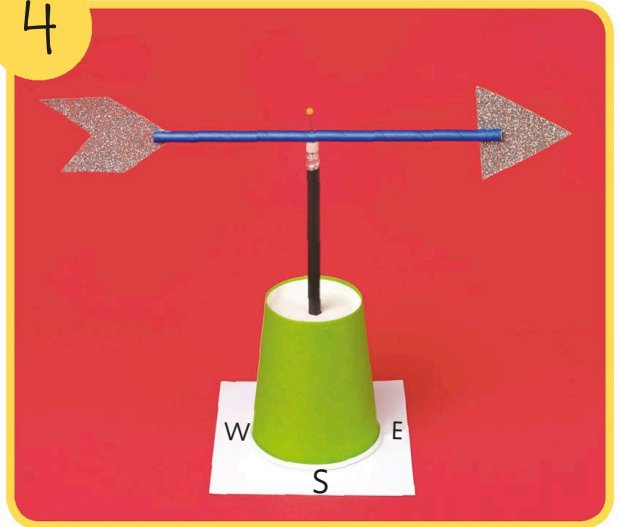

Put the cup upside down on the card. Poke the pencil through the base of the cup and into the ball of sticky tack.

3

Cut out an arrow head and tail. Make a short snip at each end of the straw. Slide in the arrow head and tail.

4

Pin the middle of the arrow to the rubber on the pencil, as shown above.
