

U.S. AGENT

John Walker longed to honor the memory of his elder brother, a helicopter pilot who died in the Vietnam War, by becoming a military hero. After a spell in the army, John contacted the mysterious Power Broker, who had designed a process that gave people superhuman strength. John became the Super-Patriot, a costumed hero who claimed to stand for American ideals of freedom and justice.

HEADING

The U.S. Agent always believed that Captain America was too lenient on criminals and out of touch with contemporary American values.

*Moon Knight's
ghostlike presence
strikes fear into
his enemies.*

CLASH OF THE CAPTAINS

The government granted Walker the name U.S. Agent, but that was not prestigious enough for him. He tried to wrest the mantle of Captain America from Steve Rogers, whom called a traitor to his country.

MOONKNIGHT

MARC SPECTOR was always a man of mystery. A former heavyweight boxer, Marine and C.I.A. agent, he was working as a mercenary when he was attacked and left for dead near an archeological dig in Egypt. He came around close to the statue of Khonshu, Egyptian god of the moon. Believing he had been spared for a reason, Spector became the moon's knight of vengeance.

Under Orders

Spector used his vast fortune to fight crime for many years. The spirit of Khonshu then ordered him to join the West Coast Avengers. Spector complied and helped the team battle the criminal cartel known as the Zodiac. Khonshu later compelled Spector to resign from the team.

WHITE KNIGHT

*Spector made a costume
from the white cloth
wrapped around the statue.*

HUMAN TORCH

LORD OF FIRE

The Human Torch could cover his whole body with flame and control every flame in his immediate vicinity. He could also fly, form flaming constructs, fire bursts of flame, and absorb heat from outside sources.

A New Life

After he retired, Hammond was reprogrammed by the criminal Mad Thinker and sent to attack Johnny Storm, the present-day Torch. Hammond later returned to crime-fighting with the West Coast Avengers and the reformed Invaders.

FLAMING MENACE

The news media proclaimed the Torch a monster when it first appeared in public.

THE FIRST HERO known as the Human Torch was born from failure. Professor Phineas T. Horton was a pioneer in the field of artificial intelligence and built one of the world's first androids in 1939. Unfortunately, it burst into flame when exposed to oxygen. In time, however, the android learned to control its flame, took the name Jim Hammond, and became a crime-fighter.

EARLY ALLIES

The Torch adopted a young mutant named Toro who had similar powers. When World War II erupted, the Torch and Toro joined with the Sub-Mariner, Captain America and Buckey to form the Invaders and fight the Nazis. After the war, they founded the All-Winners Squad.

West Coast Avengers

To strengthen the Avengers' ability to protect the Earth, the Vision sent Hawkeye to Los Angeles to form a West Coast branch. The shifting membership would include Hawkeye, Mockingbird, Tigra, Wonder Man, Hank Pym, the Wasp, the Thing, War Machine, the Bill Foster version of Goliath, Quicksilver, the Scarlet Witch and the Vision. The team battled super-enemies like Graviton, the master of gravity, the Grim Reaper's Lethal Legion, Ultron and Magнето. The team disbanded after its base was destroyed.
