HAPPY ACCIDENT

Julia gained superhuman strength and agility. She could also leap 20 ft (6 meters) in one bound.

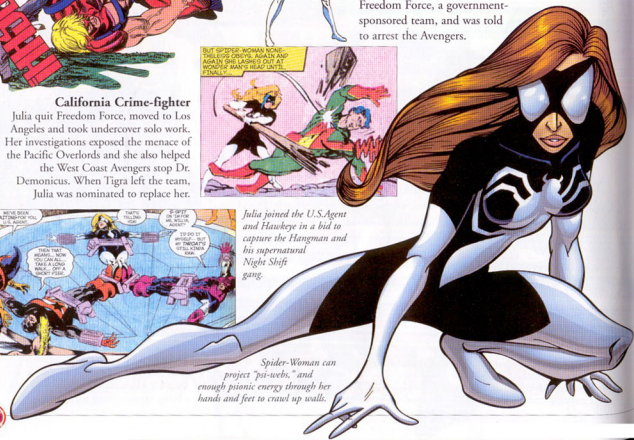

Julia quit Freedom Force, moved to Los Angeles and took undercover solo work. Her investigations exposed the menace of the Pacific Overlords and she also helped the West Coast Avengers stop Dr. Demonicus. When Tigra left the team, Julia was nominated to replace her.

Julia joined the U.S. Agent and Hawkeye in a bid to capture the Hangman and his supernatural Night Shift gang.

Spider-Woman can project "psi-webs," and enough psionic energy through her hands and feet to crawl up walls.

BACHELOR MONEY... YOU'RE REALLY OKAY, AREN'T YOU?

SURE, IT WAS SCARY... BUT IT WAS FUN, TOO.

THAT'S GOOD, BUT NOW I'VE GOT SOMETHING TO TELL YOU... ABOUT PROFESSOR ROMAN.

SHE-- I MEAN--

Julia revealed her secret identity to her daughter Rachel and even took her on some of her missions.

The first Spider-Woman had apparently retired, so Julia took the name. She met the Avengers when they were all transported to Battleworld, an artificial planet created for a series of secret wars by a being called the Beyonder. Returning to Earth, she joined Freedom Force, a government-sponsored team, and was told to arrest the Avengers.

ELVIN DARYL HALLOWAY was a short and skinny African-American child, who was often the butt of schoolyard bullies. He lived in Harlem and came from a poor, but honest family. While escaping some bigots who had accused him of stealing, he hid in a creek where a chemical company had illegally dumped radioactive material. The radiation triggered a genetic change in Elvin and he suddenly developed superhuman strength and a massive body.

Believing he had gained his powers to protect the helpless and punish the bullies of this world, Elvin became Rage. He demanded to join the Avengers because the team lacked an Afro-American member.

The Avengers refused to let Rage join, but were impressed when he put a local drug dealer out of business. After aiding them against a gang of alien criminals, Rage was invited to become a reserve member. Captain America tried to teach him martial arts, but he kept losing his temper.

The Hate Monger, a creature who fed off human hatred, allied with the Sons of the Serpent and ignited riots in New York City. Rage found himself paired with the teenage New Warriors, who helped him save Grandma Staples from the Serpents.

Though Rage looked like an adult, his grandmother knew he was still a child and often scolded him—even in public. She disliked the fact that he wore a mask and was always so angry, but she still baked him cookies.

The Avengers were forced to expel Rage from their ranks when they discovered he was still a minor and so ineligible for membership. Undaunted, he switched to the New Warriors, which he preferred anyway. Though he is currently back in high school, Rage still plans to be an Avenger when he grows up.
