

About the author

Isabel Thomas is an award-winning science writer and author of a galaxy of books for young audiences. She studied Human Sciences at the University of Oxford, so writing about people in science is her dream job! Isabel lives in Cambridge, in the UK, with three children (who are guinea pigs for her books and activities) and two actual guinea pigs (who are no help whatsoever).

About the illustrator

Jessamy Hawke has been drawing since she was old enough to hold a pencil. She lives between London and Dorset, in the UK, where she enjoys walking along the coast and finding spots to sit and paint outdoors. Jessamy also illustrated *Explorers* and *Inventors*, other DK children's books. When she's in the studio, she's kept company by her dog, Mortimer, and her two cats, Marcel and Rhubarb.

About the consultants

Dr. Stephen Haddelsey is a British historian and the author of seven books; he has also edited three historical manuscripts for their first publication. He is a Fellow of both the Royal Geographical Society and the Royal Historical Society and an Honorary Research Fellow at the University of East Anglia.

Lisa Burke has been writing and consulting on science books for DK since 2005. She studied Natural Sciences at Cambridge University, then went on to work at Sky News as a presenter, weather forecaster, and science correspondent. She created the news platform RTL Today and now lives in Luxembourg, where she works as a broadcaster across a range of different media, but always loves to promote science where possible.

DK would like to thank: Syed Md Farhan and Vijay Kandwal for cutouts; Steve Crozier for repro work; Polly Goodman for proofreading; Helen Peters for the index; Bianca Hezekiah for her insightful comments; and Tony Stevens of Disability Rights UK for his comments on the book.
