

Go to the ZOO

Your baby is so curious about his surroundings and is very receptive to new experiences. Take a trip to a local zoo or petting zoo and make the appropriate noises for each animal as you watch them. When you get home, look at pictures of the animals and repeat the noises, or sing the rhyme "Old MacDonald's Farm" while you play with a set of toy farm animals together.

6 MONTH

Start swimming

Pick a quiet time of day to take your baby for her first swim, or sign up for parent and baby classes. Check beforehand that the pool isn't too chilly; ideally it should be 86° F/30° C or more. Having fun kicking and splashing around in your arms helps her to work a lot of muscles. It's also a great way to wear her out if she's very active, and may even help her sleep well!
