

Your baby at...
0-1 months

As a small newborn coming to terms with life, your baby is completely focused on *connecting* with you. He quickly **recognizes** your voice, smell, and face, and may try to *mirror* your facial expressions.

He also needs your **love** and **reassurance** to feel secure. *Cuddling* and *talking* to him will encourage him to thrive: he'll love being *close* to you and enjoy the **soothing tones** of your voice.
