

Play the **pots and pans**

Once she's sitting upright, let your baby try some noisy games such as banging upside down pots and pans with a wooden or plastic spoon, whisk, or even a rattle. Show her how to bang the pan and then let her discover how to make sounds herself.

Dropping game

Gather up some small soft toys that are easy for your baby to grasp. Find a plastic beach bucket or bowl, sit your baby next to it, catch her attention, and then drop each toy into the bucket from a height. Say "Oops" as each object drops and then ask her if she can reach into the bucket for the toy and grab it.
