

Test her grasp reflex

Your newborn's reflexes are already developed: she'll try to grip anything you place in the palm of her hand. Let her wrap her hand around your finger, take a photograph, and frame it or stick it in an album or journal for posterity.

Memory box

Start a box of mementos for your baby. Include your prenatal scans, her hospital bracelet—perhaps even the soap you used in hospital as an olfactory reminder. Add more items—a first tooth, an invitation to her Christening or naming ceremony, a lock of hair, baby booties, a shell from her first visit to beach, a first toy—anything that tells her personal story.
