

Your baby at...

9-10 months

As your baby is now more **mobile** and becoming an *explorer*, **playtime** is getting more *adventurous*. This is a **significant** month for him as he starts to **control** the *pincer movements* of his **fingers**, which may mean that he is learning how to *drop* and *throw* objects. He may also be practising how to *wave* bye-bye, and perhaps *point* to something he wants. He's making a greater effort to *communicate* with you, too, and may be **starting to say** "mama" and "dada".
