

Baby pull-ups

Your baby will probably be developing the ability to stand upright from sitting while supported. Encourage her to start pulling herself up on her own by putting toys just out of reach on the sofa, on a chair, or on a bed, for example, so she wants to stand up by herself and stretch out her hand to grab them.

Shape-sorting puzzles

Borrow or buy a couple of simple shape-sorting puzzles and help your baby find the correct holes to slot the different-shaped pieces into.
