

Your baby at...

10–11 months

At this age your baby is learning to *play* with toys as they are intended to be used, such as **pushing** a car across the floor and **trying to slot** shapes into shape sorters—and he's growing more *self-confident* as he does so. He is working hard to *move around* more easily and **stand alone**, and to be *more involved* in the world around him using his growing **communication skills**.
