

# Make a night sky mobile

A mobile of a moon, stars, and clouds floating above her crib will entrance your baby.

- ❁ Buy a mobile frame with predrilled holes (available online or at craft stores), or use a painted stick.
- ❁ Draw templates of a star, moon, and cloud on tracing paper. Pin the paper templates onto colored felt and cut out two shapes for each star, moon, and cloud. Alternatively, draw several stars, clouds, and a moon right onto stiff cardboard, cut them out, and paint them gold and silver.
- ❁ Sew each pair of felt shapes together using a blanket stitch, leaving a 1 in (2.5 cm) hole. Stuff each shape with toy filling; use the end of a pencil to work the filling into all the corners. Then sew up each hole.
- ❁ Attach the end of a long length of thread with a knot in the end onto the top of each felt or cardboard shape using a needle.
- ❁ Arrange the shapes around the mobile or along the length of the stick and tie the thread securely in place so the shapes hang down from the frame.
- ❁ Hang the mobile out of your baby's reach.
