

Bear hugs

Your baby is ready for you to **hold him against your chest** in a **hearty bear hug** and then **tickle him** to make him laugh.

Make your own

If your baby adores soft play and it's expensive to make frequent trips to a play center, create your own soft play area. Line an empty kiddie pool with an old comforter or a blanket. Arrange some sofa cushions on the floor around it. Fill the pool with brightly colored plastic balls that are very light to handle, or use sheets of newspaper scrunched up into balls. Seat your baby down in the paddling pool and show him how to swish his arms and move them like windmills to move the balls around.
