

Chalk

drawings

Use some fat sticks of chalk to make patterns on a paved outdoor surface; your baby should be able to grab the chalk easily and make marks and scribbles with your guidance.

Hand over hand

Hold your hand out, palm down, and place your baby's hand on top of your outstretched hand. Lay your other hand on top of his, then ask him to put his other hand on top of yours. Pull your hand out from the bottom of the pile and place it onto the top. Repeat until your baby stops giggling.

MONTH 12
