

Check the diaper bag

MONTH
1

You may be more confident about taking your baby out and about now. To help you get out of the house more quickly, look through your diaper bag after each trip out and replenish the wipes, diapers, and burp cloths right away. If you get into the habit of doing this, the bag will be ready to use at a moment's notice, and is one less thing to deal with before you leave.

Let your baby get moving

Lay your baby on her back on a soft rug on the floor in a warm room with just her diaper, and perhaps a onesie, on so she can learn how to move her body. She'll try to kick her legs, wave her arms, and perhaps punch the air. Giving her opportunities to move freely every day is great practice for her muscles and coordination skills.
