

Customize her baby gym

As your baby starts to kick and swipe more confidently, her baby gym will be getting plenty of use. Customize the gym by switching the toys around, and hang some new objects from it. Choose age-appropriate toys with baby velcro straps if needed, attach them on securely, and let some dangle down so she can reach them occasionally with her hands while she's lying on her back.

Floating scarf

Fling a floaty scarf into the air and let it fall around your baby. Tell her what is happening and encourage her to look up as the scarf floats down. Repeat a few times and watch her face to see if she's enjoying the sensation. Try also using a feather boa or some feathers from an art-supply store to create the same effect.
