

4 MONTH

Reminder pad

If sleepless nights and the busyness of life are leaving you feeling foggy, stick a magnetic notepad or wipe-clean board on the fridge or somewhere prominent to add reminders to yourself about anything important you need to do for your baby. Include notes such as repacking the diaper bag, scheduling doctor's appointments, or buying more wet wipes.

Break open the bubbles

Blowing bubbles will provide your baby with hours of fun in the months ahead, and now is a perfect moment to introduce her to her very first bubbles. Either lie her flat and blow bubbles above her head so she can gaze up at them, or blow some bubbles while she is in the bath and let them pop around her.
