

Your baby at...
4-5 months

Everything you do with your baby helps him to **discover more** about his world. He's beginning to understand *cause* and *effect* when he **shakes a rattle** and it **makes a noise**, and *anticipate* a **surprise** when you play peekaboo. He will also love the **excitement** of hearing and watching you sing familiar *clapping songs* and *rhymes*. He may **enjoy** looking at more **complex patterns** now, and will *listen* carefully to the **sounds** you make as you **talk to him**.
