

199 Make a bubble snake

15
MINS

Blowing one bubble is fun, but blowing a whole stream of them at once is better still. Blow a bubble as long as your longest breath, and see how long a bubble snake you can make with this bubble blower.

What you need

- Clean plastic bottle
- Scissors
- Rubber band
- A dishcloth
- Plastic bowl
- Dishwashing liquid

1 Cut off the bottom of the plastic bottle with scissors. Cut the dishcloth into a circle just larger than the bottle opening.

2 Put the dishcloth over the opening and secure it in place with a rubber band.

Blow as long as you can!

3 Mix two parts dishwashing liquid to one part water in a shallow bowl. Dip the cloth end of the blower into the bowl, put your mouth to the other end, and blow.

200 Make a water painting

5
MINS

Take a container of water and sit down on the sidewalk or on a patio. Use either your fingers or a paintbrush to “paint” pictures of whatever you like on the dry surface.

Fingerpaint with water
