

211 Make your own bowling game

20
MINS

What you need

- 10 small plastic soda bottles, all the same size
- Food coloring
- Water • Tennis ball

You don't need a special alley to bowl. Just recycle some plastic bottles, set them up, and use a tennis ball as a bowling ball. Keep track of the scores and see who's the best bowler you know!

Try over- and underarm bowling

Add decorations on top—these are worth more points

1 Wash the bottles and remove all labels. Put a few drops of food coloring in each, then fill them up with water. Screw on the lids—make sure they're closed good and tight.

2 Add decorations on the sides or tops, if you want—you can make these worth more to knock down if you like.

3 Set up your bowling pins on level ground in a triangle shape—start with a row of 1, then 2, 3, and 4. Grab your tennis ball (or any small ball) and start bowling!

212 Play glow-in-the-dark bowling

30
MINS

Put a glow stick in each of 10 clear plastic bottles. Fill the bottles with water and screw the lids on tight. Arrange them in a triangle. Bowl with a soccer ball if the bottles are large. *Activate them first!*
