

# 273 Make a leaf collage

20  
MINS

Collages are pictures made of different objects and materials. Colored leaves are all around in the fall. Make this leaf turkey collage, then let your imagination run wild, and create your own collage design.

## What you need

- Selection of leaves and seeds
- White paper
- Glue
- Stick-on eyes (optional)

**1** Lay out your design first to be sure it works, then glue the first leaf onto the paper. Arrange the other leaves in a fan shape.

**2** Once the fan shape—the turkey's tail—is in place, glue another leaf in the center. This will be the turkey's body.

**3** Use a folded leaf on top of the body for breast feathers. Glue on winged seeds for the feet and use a small seed for the bill.

Add eyes to finish the face

# 274 Create land art

25  
MINS

Designs created outdoors using natural materials are called land art. To make your own, you can use pebbles, cones, and twigs. Remember to take a photo as a record!
