

113 Make a chalk sidewalk picture

30
MINS

What you need

- Colored chalk
- Paving stones or patio

You don't always need paper to draw pictures. Use your patio or garden path as a palette and you can create colorful chalk artworks that will wash away with the next rain shower.

Use different colors to make contrasts

1 Choose a smooth section of patio in a place where you won't have people stepping on your work. Ask permission first, though, and make sure that the chalk will wash off.

2 Decide what you want to draw. You could make one drawing in one place, or make a path out of flowers, stars, or fish, or trace around your hands to make a handprint picture.

3 Make your drawing as complicated or as easy as you like. The choice is yours! Then stand back and admire your artwork.

114 Trace someone's shadow

3
HRS

Trace a friend's shadow. Mark where your friend stood, then come back in an hour to see where the shadow falls. Repeat to see how the outline changes. Does your friend get taller or shorter?

This shadow is getting smaller
