

Using a needle threader

Too tricky?
If it's hard to thread your needle, try using a needle threader.

Needle threader

1

Slip needle threader through needle

Push the wire loop of the needle threader through the eye of your needle. Then put the thread through the wire loop.

Push through eye.

2

Pull through the needle

Pull the wire back through the needle, until the thread is brought through with it.

Pull threader out.

3

Pull thread out of wire

Remove the thread from the threader by sliding the wire loop off the thread.

Slide threader off.

4

Tie a knot in the thread

If you want to sew with a single thread, make a knot in the longest end. Then you can start sewing!

Now you're ready to sew!
