

Smile!

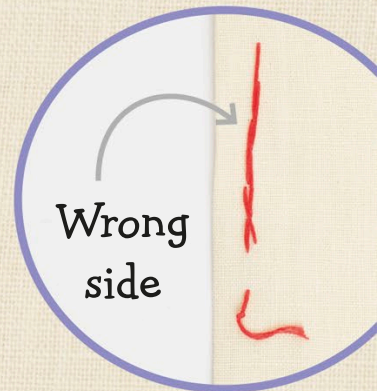

Use backstitch
when you want to
create a solid line
such as a mouth.

Next stitch

Bring your needle through from the back, one stitch length ahead of where your needle went through.

Backstitch is one
stitch back then one
forward.

Wrong
side

Right side

The stitches on the
right side are **neat**
and even, but they
look a bit messy on
the wrong side.

Backstitch
brings a **smile**
to my face.
