

Buttons galore!

Great for fastenings and decoration, buttons also make perfect eyes for toys. First, you have to learn to attach them!

How to sew on a button

Pull the thread through

Knot the thread, then push the threaded needle up through the fabric and one hole of the button. Pull the needle through so the button drops near the fabric.

Push to the other side

Push the needle back through the other hole in the button, and then to the back of the fabric. Next, bring the needle back through the fabric and the first hole.

Buttons will add a pop
