

3 Add the handle

Cut a long piece of cord for the handle. Place each end on the inside of the sock. Sew lots of stitches over each other to hold the handle in place.

Keep hydrated!

Don't dry up! Take your bottle carrier with you and drink lots of water—especially when it's hot outside.

Top tip

You might find it easier to sew on the **trimming** if you put a bottle in your carrier first.

4 Add the handle

Pin each end of the handle to the sock. Sew lots of stitches over each other to hold the strap firmly in place.

3 Sew on decoration

Pin the ribbon to the cut edge, then sew it on using running stitch. Pin and sew the felt decoration to the sock.
