

Sew a small **button** to the two wings.

1 Cut out the pieces

Use the templates on page 60 to cut out a body, beak, wings, and tail from construction paper. Pin the templates onto felt and cut around them.

2 Sew on a button

Place each large wing together with a small wing and sew together through the button.

Put the tail in position before you sew.

Use **running stitch** around the edges.

5 Pin and sew together

Fold the body in half. Pin, then sew the tail in place. Sew around the edge of the body, leaving a gap for the filling.

6 Add the filling

Stuff the bird with soft-toy filling. You can push it in with a pencil or use your finger if you like.
