

# How to make a fish

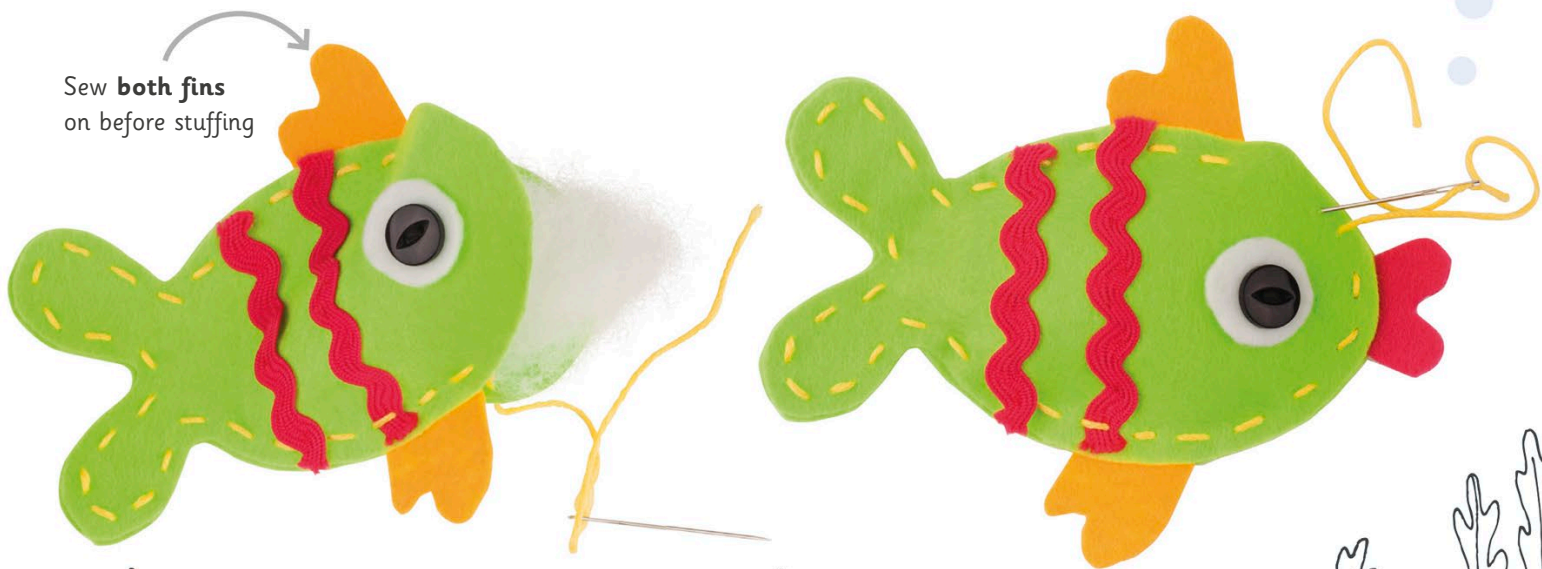

## Cut out the pieces

Trace the templates on page 62 onto construction paper. Cut them out. Pin onto pieces of felt. Cut out the shapes.

## Sew on the decoration

Sew on felt circles and buttons for eyes. Pin rickrack on each side of your fish and sew it in place using running stitch.

## Add the filling

Use soft-toy filling to stuff the body. Push it into the tail with a pencil or your finger.

## Add the mouth

Put the mouth in place, pin, and then sew up the rest of your fish.
