

Sew the body

Pin the two halves of the body together, put the fins in place, then sew partway around using running stitch.

Making friends
You can find templates at the back of the book to make me and the other fish. Why don't you make all of us? The more the merrier!

These big eyes are great for seeing under water!

How to make a jellyfish

Cut out the shape

Trace the template onto construction paper. Cut it out. Pin it to felt. Cut out two shapes.

Sew up and add the filling

Sew the two pieces together around the edge. Add the filling to the open end.

Sew through each piece of rickrack to hold it in place.

Position rickrack and sew up

Put lengths of rickrack just inside the jellyfish's body. Pin, then sew to hold the rickrack in place.

Attach googly eyes

Glue the eyes in position.
