

Slang

Slang is only used in informal speech or, sometimes, in works of fiction. It is used in place of conventional words for things that are familiar, but possibly uncomfortable, to the speaker, and includes words that are considered taboo in most contexts. Slang words are labeled as “slang” in dictionaries. Different slang words are adopted by different groups of speakers—especially teenagers. They vary across small geographic areas and change frequently over time.

Sick! That was hardcore.

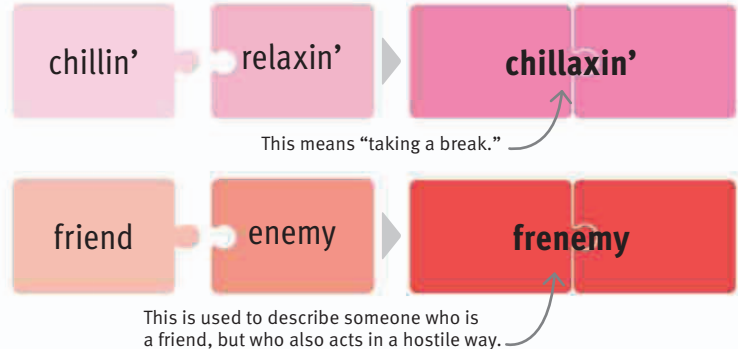

?

Slang term	Meaning
awesome	incredible, very good

noob	someone unfashionable, a newcomer
sick	very good
sweet	excellent, very good
tool	someone stupid

Changing meanings

New slang words are invented all the time, and existing slang words often change their meanings from one generation to the next. For example, the slang term *busted* used to refer to something that was broken. The term then evolved to describe what happened when someone was caught doing something wrong. In modern slang, *busted* is sometimes used to refer to an unattractive person. Existing slang words are also often combined to form new ones.

Jargon

Jargon is a type of slang. It is the name for the technical vocabulary that is used by a particular profession. Jargon is usually unintelligible to those outside the profession, but enables those within it to refer to things concisely and without explanation.
