

Black-casqued hornbill
(*Ceratogymna atrata*)
Length: up to
2 ft 4 in (70 cm)

Noisy feathers

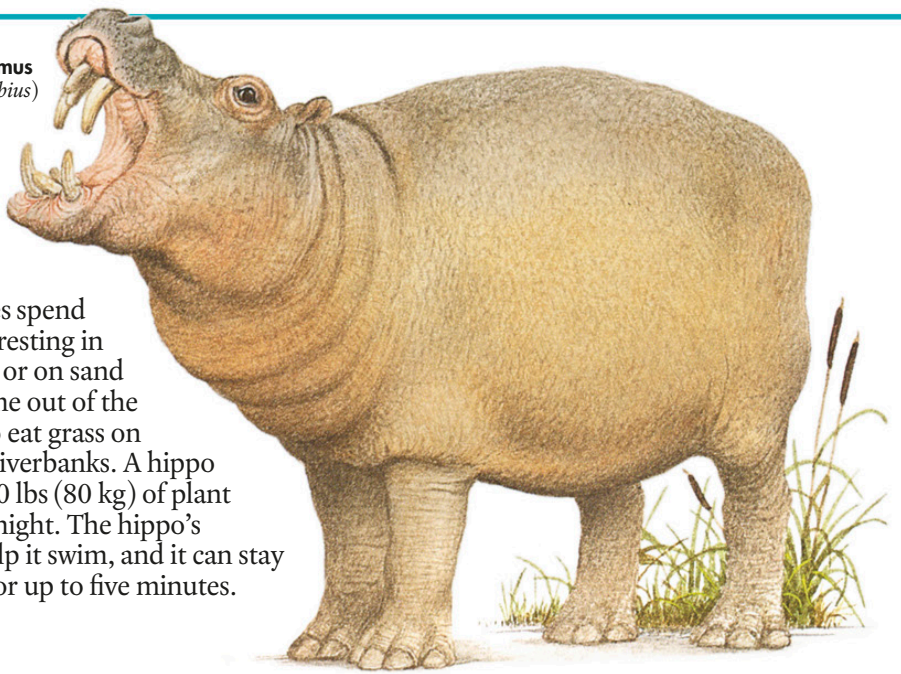

As the black-casqued hornbill flies through the rainforest, its broad wings make a loud swishing noise. This is caused by air rushing through gaps between its flight feathers. The ridge along the top of its bill is called a casque.

Common hippopotamus
(*Hippopotamus amphibius*)
Body length: up to
16 ft 7 in (5 m)
Height at shoulder:
5 ft 5 in (1.65 m)

Open wide

Hippopotamuses spend most of the day resting in lakes and rivers, or on sand banks. They come out of the water at night to eat grass on lakeshores and riverbanks. A hippo can eat up to 180 lbs (80 kg) of plant material in one night. The hippo's webbed toes help it swim, and it can stay underwater for up to five minutes.

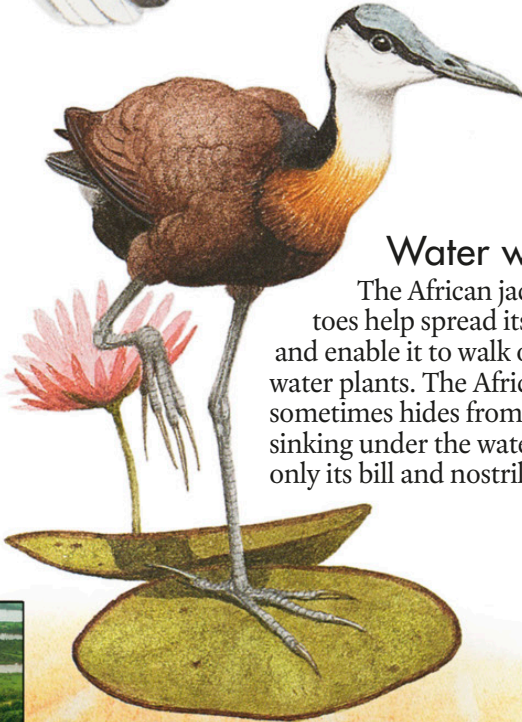

Chimpanzee
(*Pan troglodytes*)
Body length:
up to 3 ft 2 in
(96 cm)

Tool user

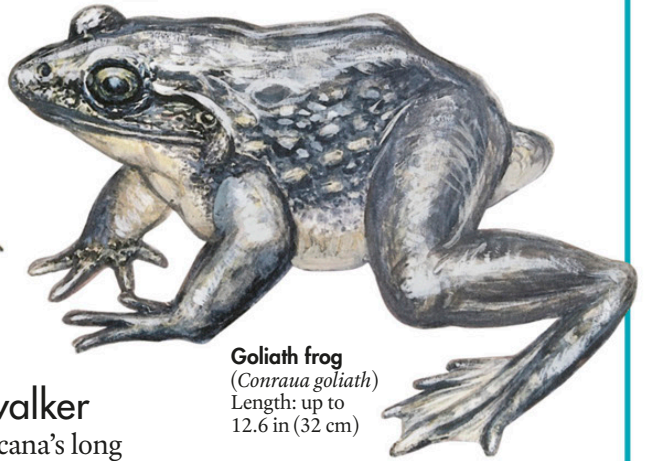

The chimpanzee is very intelligent and is one of the few animals known to make and use tools. It breaks off twigs and uses them to fish termites out of their nest, and can also use a stone as a hammer. At night, it builds a nest of twigs and branches to sleep in.

African jacana
(*Actophilornis africanus*)
Length: up to 12 in (31 cm)

Water walker

The African jacana's long toes help spread its weight and enable it to walk over floating water plants. The African jacana sometimes hides from enemies by sinking under the water, leaving only its bill and nostrils showing.

Goliath frog
(*Conraua goliath*)
Length: up to
12.6 in (32 cm)

Giant leaper

The goliath frog has long back legs and can travel more than 10 ft (3 m) in one leap. Its short front legs help absorb the impact of landing. Like all frogs, the goliath frog is a strong swimmer. Its long back legs and webbed feet push the frog through the water.

Much of the African rainforest lies in the basin of the Congo River.

The walls of the Great Rift Valley are 4,000 ft (1,250 m) high in places.

Giant African snail
(*Achatina fulica*)
Length: up to 12 in (30 cm)

Huge flocks of flamingos live on the lakes in the Great Rift Valley.
